<b>Business Requirements</b>
None

## Message Sending Sub-diagram

<b>Use Case ID:</b>	UC-003
<b>Use Case Name:</b>	<u>Sign Up</u>
<b>Description:</b>	A user should be able to sign up and create a profile so that they can log in.

<b>Actors:</b>	User		
<b>Pre-conditions:</b>			
<b>Postconditions:</b>	User has an account and profile.		
<b>Frequency of Use:</b>	Once per user		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	User clicks sign up button	Opens a form to fill in account information.
	2	User provides account information and profile information they would like to use	
	3	User clicks submit	System stores profile and account information in a database
<b>Variations:</b>			
<b>Exceptions:</b>	If an account with the same username exists, show an error and the system won't store the account or profile information		
<b>Developer Notes:</b>	Account information includes username and password, profile information includes name, fields of work, etc..		

<b>Use Case ID:</b>	UC-001
<b>Use Case Name:</b>	<u>Log In</u>
<b>Description:</b>	A user should be able to log in so they can use services provided by the system.

<b>Actors:</b>	User		
<b>Pre-conditions:</b>	Sign Up		
<b>Postconditions:</b>	User has logged into their account		
<b>Frequency of Use:</b>	Frequent		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	User clicks log in button	Opens a form to fill in account login information.
	2	User provides account login information	
	3	User clicks login button	System checks database for a user with that login and grants access
<b>Variations:</b>			
<b>Exceptions:</b>	If user provides incorrect account login information, they should be shown an error and not be granted access		
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	UC-006
<b>Use Case Name:</b>	<u>Search Profile</u>
<b>Description:</b>	A User can search for other profiles on the system.

<b>Actors:</b>	User		
<b>Pre-conditions:</b>	Sign Up Log In		
<b>Postconditions:</b>	Search results are presented to user.		
<b>Frequency of Use:</b>	Frequent.		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	User enters search information in a search bar.	
	2	User clicks on search button.	Shows search results as a drop down list.
<b>Variations:</b>	A user can Filter Profile Search.		
<b>Exceptions:</b>	If no profile fulfills the query parameters then the page displays a Profile Not Found message.		
<b>Developer Notes:</b>	Search filters can include Name, Type, etc..		

<b>Use Case ID:</b>	UC-016
<b>Use Case Name:</b>	<u>Search for Job Listings</u>
<b>Description:</b>	A Job-seeker should be able to search for a job listing so that they can see available options for jobs to apply to.

<b>Actors:</b>	Job-seeker		
<b>Pre-conditions:</b>	Sign Up Log In		
<b>Postconditions:</b>	Job-seeker is presented with available job listings that match their search		
<b>Frequency of Use:</b>	Frequent		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Job-seeker enters search information	
	2	Job-seeker clicks search button	System searches job listings database for matching job listings and presents the results to the user.
<b>Variations:</b>	User may Filter Job Listing Search		
<b>Exceptions:</b>	If no search results are returned, the user is presented with a Job Listing Not Found message		
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	UC-019
<b>Use Case Name:</b>	<u>View Job Listing</u>
<b>Description:</b>	A Job-seeker should be able to view specific details of a job listing

<b>Actors:</b>	Job-seeker		
<b>Pre-conditions:</b>	Sign Up Log In Search for Job Listings		
<b>Postconditions:</b>	User can look at the specific details of a job listing and may Apply for Job Listing		
<b>Frequency of Use:</b>	Frequent		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Job-seeker clicks on job listing on the search results page	Opens a page with details of the job listing
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	UC-018
<b>Use Case Name:</b>	<u>Apply for Job Listing</u>
<b>Description:</b>	When a Job-seeker searches and views a job listing they are interested in, Job-seeker can apply to a job listing and the application is sent to the Company who owns the job listing in form of a message.

<b>Actors:</b>	Job-seeker	
<b>Pre-conditions:</b>	Sign Up Log In Search for Job Listings View Job Listing	
<b>Postconditions:</b>	Job-seeker applied for job listing and waits for a response from employer.	
<b>Frequency of Use:</b>	Infrequent	
<b>Flow of Events:</b>		<b>Actor Action</b>
		<b>System Response</b>
	1	Job-seeker clicks on apply button
	2	Job-seeker writes a message to be sent with application.
	3	Job-seeker clicks on Send Job Application button
		Click on send application button, get job-seeker info from database, append info to message and save message in database.
<b>Variations:</b>	Job-seeker may not write a message and send the job application with a blank message.	
<b>Exceptions:</b>		
<b>Developer Notes:</b>		

<b>Use Case ID:</b>	UC-023
<b>Use Case Name:</b>	<u>Send Company Connection Request</u>
<b>Description:</b>	A Recruiter can send a Company Connection Request in the form of message to any company to connect with them and allow the Recruiter to recruit for the Company.

<b>Actors:</b>	Recruiter		
<b>Pre-conditions:</b>	Sign Up Log In		
<b>Postconditions:</b>	Recruiter sends a message to a company and waits for a response.		
<b>Frequency of Use:</b>	Infrequent.		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Recruiter clicks on Send Company Connection Request Button	Open a Send Message screen
	2	Recruiter writes a message to be sent with connection request	
	3	Recruiter uses Search Profile box to find message recipients and select them	Shows search results and selection
	4	Recruiter presses on the Send Message button.	Sends a Company Connection request to recipient. Shows a screen with successfully sent.
<b>Variations:</b>			
<b>Exceptions:</b>	Recruiter is already connected with company.		
<b>Developer Notes:</b>	When submitting the message to the company, the message is tagged with the recruiter information sent to companies using the information on the company page. Page should check if the recruiter and company are already connected. If they are then option to connect should be disabled.		

<b>Use Case ID:</b>	UC-013
<b>Use Case Name:</b>	<u>Send Acceptance/Reject Message</u>
<b>Description:</b>	For every request that comes in, the company can send a message with an acceptance or rejection for the request, requests including job application requests and recruiter connection request.

<b>Actors:</b>	Company		
<b>Pre-conditions:</b>	Sign Up Log In		
<b>Postconditions:</b>	Company will have accepted or rejected a request		
<b>Frequency of Use:</b>	Frequent.		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Company opens request message.	System displays request message that contains a accept/reject buttons
	2	Company clicks on one of the buttons.	Replies to message sender with the response and performs any additional tasks related to the request.
<b>Variations:</b>	If the request is a Company Connection Request and is accepted, the sending Recruiter's profile is updated so they can work for the company.		
<b>Exceptions:</b>			
<b>Developer Notes:</b>			

<b>Use Case ID:</b>	UC-025
<b>Use Case Name:</b>	<u>View Company Job Listings</u>
<b>Description:</b>	A recruiter can view a list of job listings posted by their connected companies. With these job listings, they can refer to them when sending to potential job-seekers.

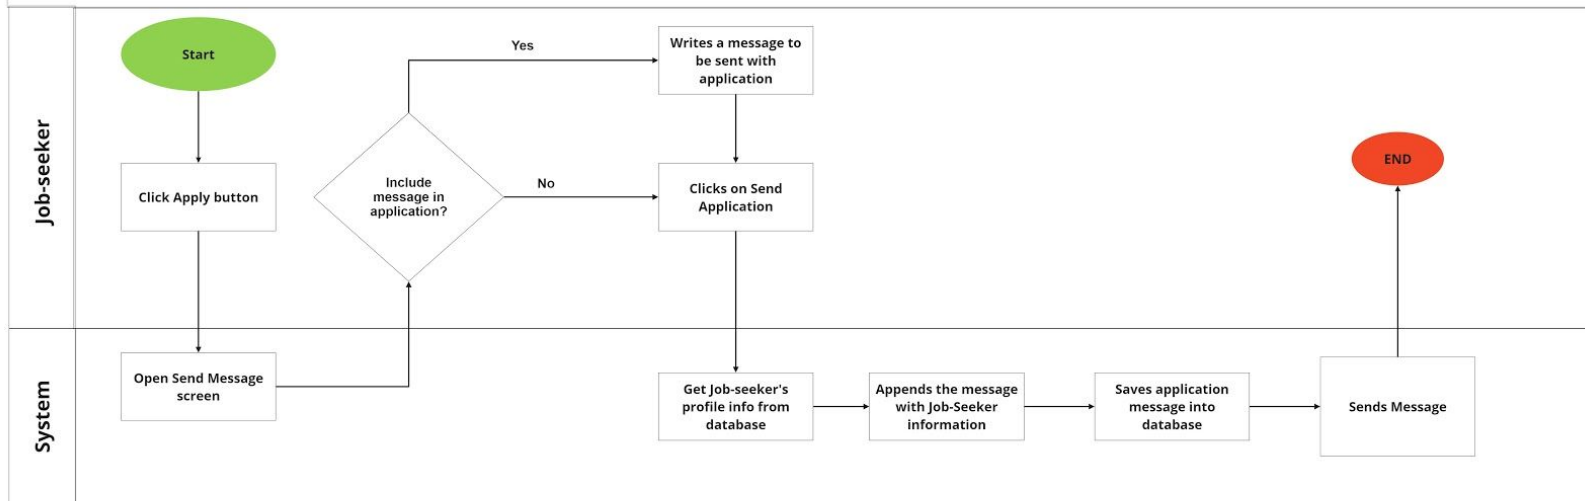

<b>Actors:</b>	Recruiter		
<b>Pre-conditions:</b>	Sign Up Log In Send Company Connection Request Send Acceptance/Reject Message (Accepted)		
<b>Postconditions:</b>	Recruiter will see a list of their company's posted job listings		
<b>Frequency of Use:</b>	Frequent.		
<b>Flow of Events:</b>		<b>Actor Action</b>	<b>System Response</b>
	1	Recruiter clicks View Company Job Listings button	Searches for and displays affiliated company's job listings
<b>Variations:</b>			
<b>Exceptions:</b>			
<b>Developer Notes:</b>	In addition to showing a list of the job listings and company names, it could also include the job code/id, link directly to the job listing, and possibly a small description about the job.		

<b>Use Case ID:</b>	UC-024
<b>Use Case Name:</b>	Send Job Listing
<b>Description:</b>	A Recruiter should be able to send a job listing to a specific Job-seeker via messaging. When a Recruiter is connected to a Company and views their job listing, he has the ability to send that job listing to a Job-seeker on the system as a suggested job.

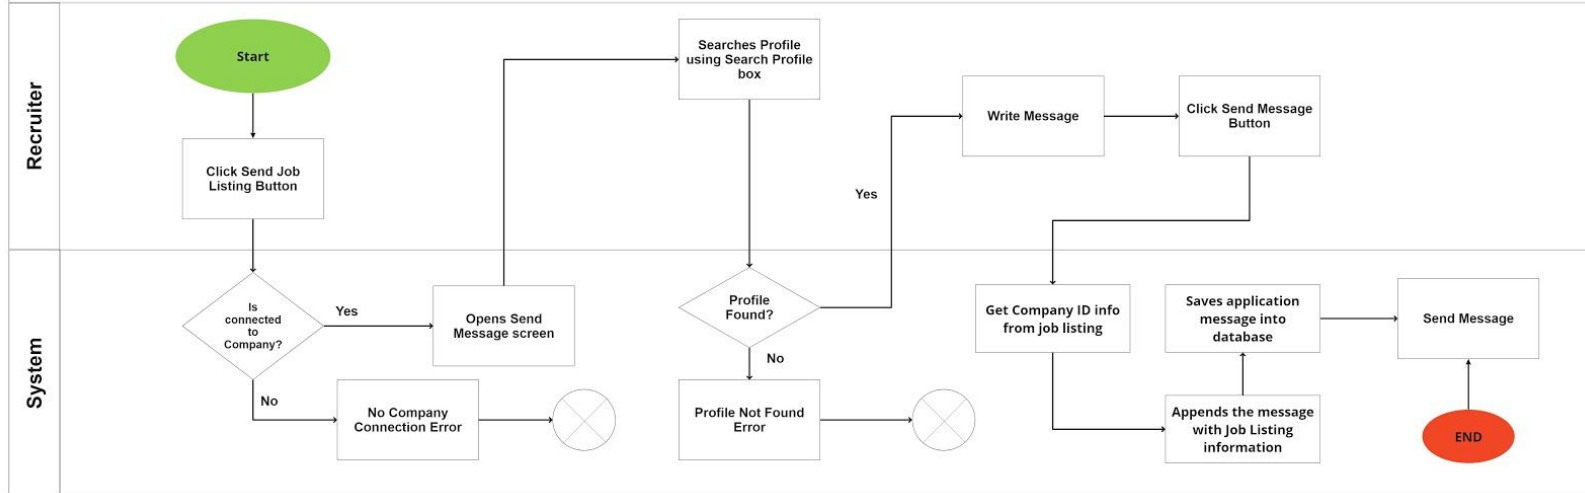

<b>Actors:</b>	Recruiter	
<b>Pre-conditions:</b>	Sign Up Log In Send Company Connection Request Send Acceptance/Reject Message (Accepted) View Company Job Listings	
<b>Postconditions:</b>	Job Listing Message sent to Job-seeker	
<b>Frequency of Use:</b>	Frequent	
<b>Flow of Events:</b>		<b>Actor Action</b>
		<b>System Response</b>
	1	Recruiter clicks Send Job Listing button
	2	Recruiter uses Search Profile box to find message recipients and select them
	3	Recruiter writes a message
	4	Recruiter presses on the Send Message button.
<b>Variations:</b>		
<b>Exceptions:</b>	If no profile is found, give a profile not found error. If the recruiter is not connected to the company, give a no company connection error.	
<b>Developer Notes:</b>

### Senior Software Engineer AND Lead Software Engineer (Data / API)

I'm working with the VP of Engineering who I placed over four years ago at a company that is now the largest provider of free internet in emerging markets in the world. The company makes all mobile content freely accessible and discoverable through technology integrated into the billing systems of hundreds mobile operators and available to 4.56 billion mobile subscribers. To date they have provided over 40 million emerging market users with free, ad-sponsored internet access."

The team over there has recently launched their newest browser which has grown to over 1MM monthly active users in the first 3 months, (and it's projected to hit 5MM monthly actives by the end of the 2017.) They are targeting company profitability in 2018.

#### **Role**

I have two roles I'm working on right now. One for a Lead Engineer and the other for a Senior Engineer – both on the Data which is a mix of software engineers and data scientists.

The APIs that support their browser are written in Python 2.7, but they consider themselves language agnostic as a group. Their data infrastructure uses Kafka, Spark, and Snowflake - all deployed on AWS.
